Title of Bill: Cancel Daylight Savings

Bill Number: 113.26

Be It Enacted By the Congress

Preamble: Whereas the current system of daylight savings time in America is faulted, a new system would increase productivity and energy efficiency in the long run.

Section 1: Eliminate the current rule of changing the time at the beginning of spring and fall.

Section 2: The elimination of the change will regulate the time in the US and eventually will lead to regulation of all the worlds' time zones.

Section 3: Benefits of the elimination of daylight saving include, no confusion because of clock changes, regulated sleep schedules for Americans all year long, and these regulated schedules will in the long run lead to better rested more productive Americans.

Section 4: Once the change has taken place in the spring the days will remain longer and therefore will save energy in the afternoons of the long winter when energy (heating) is so expensive.

Section: The elimination of the daylight savings program will take effect after the time changes in the spring of 2011.
